Epitome of the

The INTRODUCTION.

Surely the Man that scribbled to disown
 The sacred Mystery of Three in One,
 Wanted as much Divinity as Grace,
 To solve the easy Scruple he could raise !
 Such Thoughts ev'n Mercy hardly can forgive,
 To doubt those Truths we only should believe
 Appear himself and others to deceive.
 The next Dispute, his Talent will be shown,
 Not only whether there be Three but One,
 How can this Trinal Power disagree,
 Unless Confusion comes of Harmony,
 Since the same End of Government is shown ?
 Although they're Persons three, their Will's but one
 How can Perfection any Rival know ?
 Or Rival be to what is only so ?
 'Twere a Dishonour to their Deity,
 To state their Essence or their Majesty ;
 Each mighty Secret of Divinity,
 Proclaims its Author in its Mystery :
 But to convince his blasphemous Mistake,
 I'll prove the Godhead for the Sinners sake :
 We feel its Influence, that know it least,
 Which, by not comprehending, is confess'd
 So a portentous Comet in the Air,
 We see with dreadful Wonder from afar,
 This will evince that there three Persons be,
 Because their proper Offices are Three,
 The beauteous Order of each Element,
 Proves God the Father is Omnipotent,
 And He that all things out of nothing rais'd,
 At best can but unworthily be prais'd
 When Satan conquer'd our indulgent Eve,
 The Second Person, *Christ*, did us relieve ;
 Not only rescu'd us to Liberty,
 But made us Heirs to Immortality.
 Then by the Third, the Conduct of the Spirit,
 We Sin avoid, and lasting Bliss inherit.
 Thus they, distinct in Operation,
 Appear as Three, and yet agree as One :
 And tho' each God is God himself and true,
 They are but one in Power and Essence too.

Great is the Name of King, and full of Splendor,
Great, Good and Just is our great Faith's Defender;
May he live long, his Enemies to quell,
And Honour those who have deserved well.
As Age comes on, Lord, let his Joys encrease;
And keep us in continual Peace:
So having long his Earthly Crown enjoy'd,
And by his loving Subjects been obey'd,
Let him at length enjoy a Heavenly Crown;
Where Saints and Angels sit in high Renown!

The Table of the Terms Explain'd.

NOW every Term hath part, or all those Returns, viz. *Craftins*, *Octabis*, *Quandens*, *Tri. Mensis*, and *Quingus*: Every Return el-
so has a *Basis* or *Know-day*, from whence they make their re-
turning, the signification of which are: *Craftins* is the Morrow after
the *Basis*, as *Craftins Trinitatis* is the Morrow after *Trinity Sunday*, it
being the Day of Denomination; *Octabis* is eight Days inclusively;
Quandens is fifteen Days after, and *Tri. three Weeks*, *Mensis* a Month,
and *Quingus* five Weeks after.

Now every one of these Returns has four Days to consist upon,
the first whereof has double signification, for the one is the Day of
Return, the other the Day of *Effoyne*, for the Defendant in a Per-
sonal Action, or the Tenant in a real Action to be esjoynd; the se-
cond is the Day of Exceptions for the Plaintiff, to lay an Exception if
no *Effoyne* be cast, that the Defendant shall not be esjoynd or a-
verred; the third is *Returna Brevisius*, or Day whereupon the Sheriff
must return the Writ, and the fourth is the Day of Appearance for
parties and Jurors in the Court of Common Pleas. But if any of
these Days fall on a Holyday, that is no Court Day, as in Easter Term
on *Whit-Tuesday*, or upon *St. John Baptist* in Trinity Term, in Mi-
chaelmas Term, on *All-Saints*, or *All-Souls Day*; and in Hilary
Term on *Candlemas Day*: Or upon any Sunday, which are no Court-
Days, then must the next Day following serve for both; as if the
Effoyne Day, and Day of Exception, and so of the rest. These Days
are of most use in the Common Pleas, where all Suits commence, ex-
cept for Latitats, or other Procees upon a Bill certain, it is upon a Day
certain, as *Die Luna prox. post Pasch.* which always is reckoned from the
Effoyne Day. In the Chintery Court none of these Returns are used,
but only the Day of Appearance, which is *Quarto die post*: But if a
Writias, *Exigent*, *Scire-Facias* or *Distingas*, be executed after the *Effoyne*
Day, by the Sheriff, or a Commission let upon, out of any of the
foresaid Courts, after the said *Effoyne* Day, it is neither justifiable
nor warrantable.

*Lo! here's a Trade surpasseth all the rest,
No Change annoys the Lawyer's Interest:
His Tongue buys Lands, builds Houses without Toil;
The Pen's his Plough, the Parchment is his Soil:
Him Storms disturb not, nor Militia-Bands;
The Tree roots best, that in the Weather stands.*

The Use and Explanation of the Almanack.

ON the Left Hand Page there are eight Columns: The first shews the Day of the Month; the second the Days of the Week; the third shews the Fasts and Festival Days, used in the Church of England, as also the Rising, Setting, and Southing of the Stars, and other noted fixed Stars; the fourth shews the Sun's Place; the fifth, the Moon's Dominion over the Body of Man; the sixth sheweth the Moon's Age every Day of the Month, which answers to the Moon's Age in the Tide Table, and is the most easie and readiest way to find the time of High Water at all those Ports and Places found in the Table; the seventh Column shews the time of the Moon's rising and setting in Hours and Minutes; from the Change to the Full, you have the time of her setting in Hours and Minutes; and from the Full to the Change you have her rising also in Hours and Minutes. A stands for Afternoon, and M for Morning. Example, Suppose you would know when the Moon sets on the 1st Day of January this Year 1723; over against which Day, in the Column of the Moon's rising and setting, you have 11 A 13, which shews the Moon sets at 11 and 13 Minutes past in the Afternoon, denoted by the Letter A, and so of the rest: the last Column of this Page shews the Mutual Aspects of the Planets and the Weather.

The Right Hand Page hath five Columns: The first shews the Day of the Month, according to the English Account; the second shews the Day of the Month, according to the Roman Account or New Style; the third the rising, and the fourth the setting of the Sun: Thus, on January 1st the Sun rises at 8 a Clock and 6 min. past; and sets at 3 and 54 min. past, and so on of the rest. The fifth and last Column shews the Fulls, Changes, and Quarters of the Moon, with Remarks and Astrological Observations.

Moore. January hath xxxi Days.

Our Maker made the Man first free from Vice,
And plac'd him in a pleasant Paradise,
And freely gave him Freedom at his Will,
To chuse the Good and to refuse the Ill,
And of his Flesh made him a Fellow dear,
And gave him rule o'er all things that were there.

There are but two Eclipses this year, both of the Sun, and both invisible to us; the first is on *Thursday* the 23d of *May*; the second is on *November* 16 day at 9 at night, and for that reason invisible to us.

Full Moon 10 day, at 9 in morn.

Those three late direful Aspects of *Saturn*, *Jupiter*, and *Mars*, affords matter enough to discourse of for not only this month, but for all the months in the year; however it may be necessary to take into our consideration the Aspects of each particular month as

debates and controversies in divers countries; nimble *Mercury* acts his part, many scandalous Libels published, and the Authors thereof encouraged, but their time's but short.

Moore. February hath xxviii Days.

All which for good, God highly did commend,
But as to Man (least that he should offend)
He silent was, till that the Truth was try'd,
Whether or no, therein he would abide
This happy Husband then and hopeful Wife,
Both bore the Image of the Lord of Life.

 But then Deceit did in the World begin.

Astrological Observations.

Res amicos invenit.

First Quart. 2 day, 7 at night.

This month is usher'd in with a conjunction of *Sol* and *Mercury* in *Pisces*, and *Mercury* retrograde in motion. This may set some hor-brain'd fellows at work, a vending of lies, and rediculing the Higher Powers, for which

they may happen to meet with their deserved reward.

This is followed by some other very threatening Aspects, as the Square of the *Sun* and *Saturn*, and the Square of the *Sun* and *Jupiter*, and all from

Last Quart. 18 day, 6 at night.

Cardinal Signs. Something very material is now set on foot, and a certain Potentate menaced; *Denmark*, *France*, *Germany*, *Saxony*, and *England* itself is threatned, let the Jesuitical Tribe look to it, for if they should now have any

Moore. April hath xxx Days.

If we encomionize the Lives of Men,
 I'th' Calendar of Time, with Golden Pen,
 It's due to those which do relieve the Poor;
 Like the wise Virgins, to have Oyl in store
 To trim their Lamps, to make a light Divine,
 To meet their Bridegroom, and with him to shine

There are many significant Configurations, this Month of the Superior Planets with the Inferiors; and those Full Moon 5 day 9 morn.

too which are very benivole and healing, except the Quartile of Mars and Mercury, and Saturn, and Mars, from Sagittarius, and Virgo, which signify some Religious Contentions in Italy and Spain. But for the rest of the Quart, the 12 day at 1 morn.

the Aspects of this Month, they are so numerous and powerful, that notwithstanding those before mentioned, we may expect to hear good News from Abroad, and many weighty Matters carried on to good Purpose at New Moon 19 Day at 5 even.

Some Preparations for great Councils and Consultations, about Matters tending to the Good of Mankind in general.

Some close Contrivances on foot, and many Contentions about Religion and Fifth Quart, 27 day at 9 at night Religious Matters; And perhaps some suffer for seditious Speeches.

September hath xxx Days

The Miser ne'er regards the Poor, Man's Sorrows
 Who wants wherewith to buy of his kindred or borrow
 But when they once look back upon their ways
 They'll then behold their Trade of Life to be
 How they left Virtue starving at the Door

Astronomical Observations.

Such as have been enriched with
 Full Moon: day 6 even.
 Other Men's Ruins: will be reinforced
 their own Riches.

The 3d, 4th, and 5th of this Month
 1686, was DONDON burnt by most
 Vile Incendiaries: the Papists: These
 Dark Quarts: to day at 10 morn.
 fore ought we (as a worthy Anchor
 takes notice) to let the Remembrance
 of SIXTY SIX be engraven in indele-
 ble Characters on the hearts of all that
 live, to make them abhor POPERY,
 and detest such vile Incendiaries: Let
 it remain a Monument of Calamity.

New Moon 18 day at 10 morn.
 to God, of Caution to England, and of
 Shame to Rome.

The grand Effects and Violence of
 the whole Year seem to be appointed
 for this Month, and part of the next
 which Effects will be so uncomfortable
 that I care not to repeat them: And I
 believe my Reader will not care to hear
 them; let Spain, Hungary, &c. look
 to it.

October hath xxxi Days

Whilst Vice came in at an accomplished Man,
 And was saluted with the Silver Can,
 And prefer'd: But Virtue must not flourish;
 And liberal Arts amongst the Poore must perish.
 The Life of Man's a Span in Measure,
 And Vanity its only Pleasure.

 bout 19 m. after 5. in the Evening, the
 Star *Mercury* may be seen in the *Sun*, a
 Spot amongst his Radiancy.

November hath xxx Days

The Poor Man from the Rich man must stand
 Crippling and crawling long in pain
 Perhaps, for what's his Inward Demand
 No alms Encouragement will he receive
 Is such, whereof a man can scarcely live

4	17	The Aspects of this Month are but few, yet full of Matter: it looks as if we should hear of some Insurrections and Murders committed by some turbulent and furious Spirits of the South Sea.	
5	15	Quar. 1 day 4 in evening	
6	14	Nelson. It is much if there be not some Misunderstanding between some neighbouring Princes or Allies: or if its Archduke involved in some Wars and Contentions.	
7	12	Saturn hath now in good Earnest left New Moon 10 day at 9 10 night	
8	11	the Sign Sagittarius, which he hath been transiting thro' Three Years: In March last he left Sagittarius, but re-entred it again in April, but now has taken his Parcel of it for 7 or 8 and 90 Years.	
9	10	and on the 20 Day of this Month entered Capricorn.	
10	9	First Quar. 14 day at 6 noon	
11	8	Hermes saith, when Saturn leaves Sign he causes strange Apparitions in the Heavens, which the Arabians term Sub, or Signs of a Fiery Nature.	
12	7	Full Moon 30 day midnight	

December hath xxxi Days.

But here my Muse is fencer'd & and barr'd,
From meddling much with those which move
Or of their darker Deeds my Mind to write.
Left Paper should be stain'd with Works of Night
And so farewell; for fear I should offend,
I'll pray, that all Men may their Lives amend.

Sum	Diff	As	Astronomical Observations
1	43		
2	48		This Moon does with a very angry
3	41		Countenance. And were not the Win-
4	42		ter so far advanced, I should be apt to
5	48		take considerable Actions to attend
6	48		to the Kind of Configurations. But as
7	48		this is not a Time for Action, so I
8	48		will not do it. Last day at 1 afternoon.
9	41		I hope that the Effects will be shown in
10	48		of Debates and Controversies in the
11	48		Councils, as well as those Parts of
12	48		Heaven where they are celebrated; as
13	48		Sweden, Russia, Lorraine, Poland,
14	48		Germany, Holland, and other Places be-
15	48		hind Sea. Neither shall we at home
16	48		be free from Quarrels and
17	48		Violations, and many unhappy Ac-
18	48		cidents; as Murders and Robberies
19	48		in both Cities and Countries; great
20	48		Losses and Damages at Sea, occa-
21	48		sioned by bad Weather. As also
22	48		Fire, &c. 23 day at 3 afternoon
23	48		Sea Thieves and Privateers. And ma-
24	48		ny inexpressible Calamities end the
25	48		Year.

By this Table to find the exact Time of the Rising, Setting, and Setting of the Fixed Stars there; and first their Southings.

From the Right Ascension of the Star found in this Table, subtract the Right Ascension of the Sun, the Remainder is the true time of the Star coming to the South.

Examp. This present Year 1723. April 24 day, I would know what Hour, Min. &c. *Arcturus* comes to the South.

Right Ascension of <i>Arcturus</i> (12 ho. add) is	14 3 20
Right Ascension of the Sun, subtract	2 52 6

Arcturus South at Night 11 11 14

And if the Rising and Setting be required, take out the Semidiurnal Arch of the said Star, which subtract for the Rising, and add for the Setting, to or from the Southing before found, so have you the Rising and setting given.

<i>Examp.</i> Time of Southing as before	11 16 14
Semidiurnal Arch	7 55 10
for the Rising, subtr.	
for the Setting, add	

<i>Arcturus</i> Rises in the Afternoon at	3 16 4
<i>Arcturus</i> Sets next Morning at	7 6 24

The Poetical Rising and Setting of the Stars are manifold in respect of the Sun, which I cannot shew here for want of room, though first you must know that the Vertical are such, as every Day pass once by the Zenith of the place; and this may be known from the Elevation of the Pole of the place, and Declination of the Star given for if the Elevation of the Pole and Declination of the Star shall be equal, and of the same Denomination, the Star is (when it transits the Meridian) Vertical to that place. As for Example, The bright Star of the Dragons Head hath $51^{\circ} 36'$ N Declination, so at the time of its Culmination it's near Perpendicular to London, and passeth by their Zenith. Again, those Stars always Rise and Set whose Declination is less than the Complement of the Poles Elevation; but if their Declination be greater, they are always Day and Night above the Horizon always hid, and so never appear to such Inhabitants.

Of the Winter Quarter,

OR the Sun's Ingress into *Capricornus*, or the *Celestial Goat*, which is upon Tuesday the 11th Day of December 1722, at 59 min. past one, in the Morning. This is called the *Brumal Quarter*, and contains that Space of the zodiac that bright Sol makes his Perambulation through *Capricornus*, *Aquarius* and *Pisces*; which is from the 11th of December, all *January* and *February*, until the 10th of *March*: In the Scheme of this Winter Quarter 21 deg. of the Equinoctial Sign *Libra* ascend the *Horoscope*, 28 deg. of the Tropical Sign *Cancer* culminates; *Saturn*, *Jupiter*, *Mars* and *Mercury*, are all in the 3d House, near the Cusp thereof; and near to *Cauda Dragonis*, and opposed by the Moon in the 9th House: This looks as some Treaty were now on Foot, I don't think between warring Nations, in order for a Peace, but that the contending Parties are busied in gaining new Allies, and increasing their Strength for the more vigorous Execution of their Designs, *England* is like to be concerned herein, as indeed is most European Nations; *Sagittarius*, the Ascendant of *Spain*, is the Court of the *Cælestials*, it is therefore about that Nation, that most other Nations are met about.

The Spring Quarter,

OR the Sun's Ingress into *Aries*, or the *Celestial Ram*, which is upon Sunday the 10th day of *March*, at 51 min. past 3 in the morn. at which time 27 deg. of the *Cælestial Goat* or *Capricornus* ascends, and the very Beginning of *Sagittarius* is on the Medium *Celi*, *Saturn* and *Jupiter*, are both in the 12th House, and in Square to the Sun in the 2d House; the Moon is virtually in the 8th House, and in Opposition to *Mercury*. These Positions are not very promising, neither can we think that any Good will proceed therefrom, unless we take it that Sorrow is the Antecursor of Joy, tho' to *England* there is promised Health, Prosperity, and the Advantage against their Enemies; for that *Mars*, *England's Patron*, is with the Benevolent Planet *Venus*,

Venus, in the Ascendant, and in Sextile to the Sun; but *Saturn* Lord of the Ascendant, and *Almuten* of the Figure Cadent in the 12th House, and in exact Square to *Sol*, give Occasion to fear that Men will sustain much Sorrow, Losses and Croſſes, and great Damages by Rain, Wind, and sudden Storms, and *Jupiter* being with *Saturn* in the 12th House threatens Spain, and some other Countries subject to the Sign *Sagittarius*, with Sicknesſes, Diseases, Losses, and thousand other Afflictions. Within the Limits of this Quarter happens a most hateful Square of *Saturn* and *Mars* and a Square of *Jupiter* and *Mars*; the Square of *Saturn* and *Mars* is from *Sagittarius* and *Pisces*, the Houses of *Jupiter*. That Nation or People herein concerned shall suffer many strange Mutations, Sorrows and Miseries shall be multiplied upon them. These Evils will first begin from the Tyranny of their Prince or Prince; and from some religious Debates or Controversies; *Saturn* at the time of this Aspect being in *Sagittarius*, the Ascendant of Spain, and *Jupiter* Lord thereof coming to the Square of *Mars* immediately after, which considered with that notable Congress of these three Superiors in December last, looks as if Divine Providence had ordained some Places subject to the said Sign, to an inevitable Destruction, and that too as I noted before for their horrid Superstition and Idolatry. Antichrist must have its Fall, perhaps the Time is now near at hand — One *Malachy* (a Popish Saint) Archbishop of Dublin in Ireland, after having declared the Number and some Remarks of all the Popes that shall be hereafter (one he calleth *Proveſe*,) another an insatiable Beast, another a ravenous Eagle, another a Dog and a Snake, and indeed think these are proper Comparisons enough for all the Popes that have yet been; but one he call's, *De bona Religione*, of a good Religion; this Pope is yet to come sure. But however, after having Hieroglyphically decyph'ed more than a good many of them, our *Viſſ* Prophet concludes with this sad and final Destruction of Popery, and the City of Rome; *O bone! bone! — In persecutione extranea Sacra Romana Ecclesia Sedebit Petrus Romanus. qui pascet Ovem Multis Tribulationibus quibus transactis Civitas Sepulchris d'ruetur, et iudex tremendus iudicabit populum.* In English thus

In the last Persecution of the Holy Roman Church, Peter a Roman shall possess the Chair, and feed the sheep in many Tribulations; which being accomplished, Seven-hill'd City shall be destroyed, and the dreadful Angel shall call the People to Judgment. — I would my Reader take Notice that our Pope Prophet styles late Pope Clement XI. *Pontificatus Gloriosa*, a glorious Pontent; and his Successor, *Rastrum in Porta*, a Rake in the Gate. Thus far our *Irish Pope Pythonist*, which I shall leave of at present, Hoping his Number of Days shall be less need, and that the Prayers of the Faithful, and the Cries of the Martyrs slain under the Altar, in short Time draw down and accelerate the just Judgment threatened to this Babylon and Spiritual Sodomy, and proceed to

The Summer Quarter,

At the Sun's Ingress into Cancer, the *Celestial Clock*, which is upon Tuesday the 11th Day of June at 57 min. past the Morning, when two Deg. of Cancer is in the Eastern Horizon, and 27 Deg. of Aquarius on the Cusp of the tenth, the Sun is near the Degree ascending, and in Opposition to Jupiter in the 7th, and to Saturn in the 6th; the Moon is in the 9th House, in Aquarius, and in Square to Venus in the 12th, and in Sextile to Saturn and Mars; Mars is in the 6th House in Trine, to Mars in the 11th. This Season affords us Variety of Transactions, some Nations Happy, and others Miserable; some for War, and others for Peace. Our own Nation bears a good Prospect, its Natives look pleasant, our Trading is brisk at Home, Credit increases Abroad, and our Government Mild and just. Mars our Protector is strong and Potent as being in his own Domal Dignities, located in the 11th House, the House of Friendship, and in Trine to Saturn, and in Sextile to the Moon, and the most powerful of all the Planets at this Ingress, making this a joyful and happy Nation, treating its Friends and subduing its Enemies. Thus much

in general Terms.—— Thus far premised, I shall now proceed to the Examination and Judgment

Of the Autumn Quarter.

THIS Autumn, or Harvest Quarter, is the last which I have to consider for this Year, and it begins at the time as the Sun makes his Ingress into the Equinoctial Sign *Libra*; which is on Thursday the 12th Day of September 18 min. past 5 in the Afternoon, when 6 Deg. of the Celestial Fishes are in the Oriental Firmus; and 20 deg. *Sagittarius* on the Angle of Honour. The glorious Lamp of this visible World the Sun, is in the great Angle of Business, and in square to *Saturn* and *Jupiter*, *Saturn* and *Mars* are in Opposition, and both in square to *Venus*, the Moon is in the 6th House, in square to *Mercury*.—— The Transactions of this Quarter are like to have more of the Sallomander in them than any of the other three foregoing, as such too will be its Operations, as all the World will be sensible of. I should here, had I room, dilate on the more material ones; but as I have almost run my Limits, I must of Necessity curtail my Discourse, and say thus much in General, That as the primary Planets are all Angular, and either in their own Dignities, or in Reception. I say, That they are in the highest degree qualified for very powerful Transaction, and seeing no better Harmony amongst them than you have heard, we may easily conclude that they will be mischievous ones. Some pretended Patriots —— Hold let me make this Disingissin: Should I proceed, I may perhaps (by some tainted with Precipitancy) be accused of ludicrous Assertions, or a Burlesque and Banter on my Superiors, the which is incompitible with my Design; but to avoid Ambages, I shall conclude with this Apophegm “ Afflictions from the Hand of Heaven often makes us look into ourselves to find the Original Cause, by which means we detect and punish those Crimes and Follies which we had industriously concealed, or perhaps audaciously avowed.
